### MARKET REVIEW

On April 15 the Department allocated 1,250,000 tons of raw sugar for importation from foreign countries during the third quarter of this year. The total allocations of foreign quota raw sugar during the first three quarters of the year thus totals 2,950,000 tons or about the same as the average receipts during January-September 1963 and 1964.

Individual set-asides for Philippine raw sugar will be approved when the applicant submits a certification from the Sugar Quota Administration of the Republic of the Philippines that the sugar will be cleared by the S. Q. A. for exportation to the United States at a time that will permit arrival in the month designated on the application for set-aside.

Pending applications will be approved for approximately 225,000 tons of Philippine raw sugar for arrival during July; 156,000 tons for arrival in August; and 111,000 tons for arrival in September. Approval of set-asides for all foreign raw sugar, including Philippine, during these months was in about equal quantities. (See page 4).

The spot price for domestic raw sugar during the period April 1 - 22 was 6.58 cents and was at 6.60 cents per pound on April 22. The average price from January 1 through April 22, 1965 was 6.72 cents per pound as compared to 8.08 cents for the same period last year.

The spot price for world sugar averaged 2.42 cents per pound from January 1 through April 22 or 3.37 cents below the domestic raw sugar price on a comparable basis, including freight and duty. During the same period last year the world price on a comparable basis averaged 1.72 cents higher than the domestic raw sugar price.

As previously announced, the quoted price for refined sugar in the Lower Pacific Coast territory was increased 0.30 cent to 9.05 cents per pound

effective April 1. Through April 22 no other price changes had been announced and the prices quoted by territories were as follows:

	<u>Cane</u>	<u>Beet</u>
	<u>Cents per pound in 100 lb. paper bags</u>	
Northeast	10.05	
New York Metropolitan area	9.95	
Southeast	9.35	
Gulf	9.25	
Eastern beet		9.15
Chicago-West	9.35	9.15
Direct shipment territory	9.25	9.05
Lower Pacific Coast	9.05	9.05
Northwest Intermountain	9.15	9.15

Deliveries for U. S. consumption as reported through April 17 totaled 2,546,000 tons. Constructive deliveries at the end of 1964 were 17,000 tons so that physical deliveries have been 2,563,000 tons and would appear to be about in line with usage through mid-April. Deliveries during the first week of January were at a very high level, about 230,000 tons, as a result of announced price increases, but since that time have been lower than estimated use.

Puerto Rican sugar production through April 18, 1965 totaled 621,088 tons as compared to 674,285 tons during the same period in 1964 and 611,591 tons in 1963.

Hawaiian sugar production through April 17, 1965 was 272,095 tons. This was about 33,000 tons less than production to that date in 1964 but 84,000 tons higher than comparable production in 1963.

As of April 23, 1965 sugar production from the 1964-65 crop in Florida was apparently completed and based on preliminary reports will total about 574,000 short tons, raw value, or slightly above sugar production in Louisiana of 572,000 tons, raw value. Sugar production from the 1964-65 mainland cane crop will total about 1,146,000 tons, raw value, or 37,000 tons less than from the previous year's crop. The hurricane in Louisiana and the freeze in Florida reduced production by about 300,000 tons from early estimates of the 1964-65 crop year production for the mainland cane area.

Quota raw sugar arrivals authorized for importation from foreign countries, 1965 first half totals, third quarter by months and totals, January-September

### ADMINISTRATIVE ACTIONS RELATING TO 1965 SUGAR SUPPLIES

Authorization of Sugar Imports during third quarter of 1965 announced:  
(April 15 1965)

The United States Department of Agriculture today allocated to foreign countries 1,250 000 short tons of raw sugar for importation during the third quarter.

Allocations were made to enable countries to import during the first nine months of this year in ratio to their average sugar imports during the first three quarters of 1963 and 1964. Some countries prefer to import in the last quarter a portion of the sugar they are entitled to import earlier. Accordingly each other country will be able to import during the first three quarters of the year either (1) the full quantity of its 1965 quota or (2) at least 110 percent of its average nine-month importations in 1963 and 1964.

Importation of 758,292 short tons, raw value, has been authorized pursuant to applications for set-aside of quota. The remainder of 491,708 short tons raw value, represents the quantity reserved for the Republic of the Philippines. This quantity nearly completes the 1965 quota for the Philippines, except for 60,000 short tons, raw value, of direct-consumption sugar which may be imported at any time during the year. However, applications have been received for more than a million tons of Philippine sugar for importation during the third quarter. Clearly a substantial duplication of quota rights is reflected in the applications on hand.

The Republic of the Philippines fixes annual quotas and issues quedans (warehouse receipts) to mills and planters for their respective shares of sugar which may be shipped to the United States market. To assist the Department in considering the applications for quota set-aside, each importer who submitted an application is being asked to notify the Department on or before April 21 of the quantity of sugar for which he or his Philippine principal(s) held 1965 quedans (warehouse receipts) as

of April 12 which were in addition to those required to cover set-asides of U. S. quota previously approved for importation during the first half of 1965. He is also being asked to submit whatever information or supporting evidence that may be available to establish his entitlement to import the sugar for which application was made. The Department will consider the applications of quota set-asides for Philippine sugar shortly after April 21.

The following table shows quantities in tonnages of:

- (1) applications for third quarter importations
- (2) importations approved or in the case of the Philippines, the quantity reserved for the third quarter
- (3) total importations for the first nine months (inclusive of first half importations previously approved) and
- (4) quota balances remaining to cover importations of raw sugar during the last quarter of 1965.

<sup>1/</sup> For raw sugar available for importation in the last quarter, exclusive of following quantities which may be entered as direct-consumption sugar: Republic of the Philippines, 60,000; Ireland, 2,311; Panama, 3,817; Belgium, 182.

<sup>2/</sup> Reserved for the Philippines; but set-asides of quota not yet approved.

<sup>3/</sup> 4,639 tons of 2,950,000 ton total represents final weight adjustments.

ADMINISTRATIVE ACTIONSDate announcedNature of action

March 22,  
1965

Amends Sugar Determination 851.1, Rev. 1. by providing that the maximum acreage that may be committed to any farm supplying the proposed beet sugar facility in the vicinity of Auburn, New York shall be the acreage which the Agricultural Stabilization and Conservation State Committee determines can be planted on such farm. (See March 26, 1965 Federal Register).

March 31,  
1965

Announced limitations of 1,250,000 short tons, raw value, on importations of raw sugar from all foreign countries as a group during the third quarter of 1965. (See April 2, 1965 Federal Register).

April 9,  
1965

Announced processor allotments of the 1965 quota for the Mainland Cane Sugar Area totaling 805,500 short tons, raw value, replacing preliminary allotments which have been in effect since Jan. 1, 1965.

These allotments were established on the basis of a public hearing held on Feb. 19, 1965 in New Orleans, La. (See April 14, 1965 Federal Register).

April 27,  
1965

Local producing areas in 9 states designated as eligible for prevented acreage credit with respect to 1964 crop of sugarbeets. (See April 27, 1965 Federal Register).

STATISTICAL SERIES IN THIS ISSUEHIGHLIGHTS

1. March 1965 sugar deliveries for continental U. S. consumption 772,000 short tons, raw value (preliminary) up about 162,000 tons from February 1965 and up 72 000 tons from March 1964. January-March 1965 deliveries 2,127 000 short tons, raw value, up 204,000 tons from January-March 1964. Final data for February 1965 deliveries 610,000 short tons, raw value - previously published preliminary as 620,000 tons.

2. Primary distributors' stocks April 3, 1965 were 2,626,677 short tons, raw value (preliminary), up 93,000 tons from a year ago, and down 104,000 tons from February 28, 1965. During March refiners' stocks increased 25,000 tons, beet processors' stocks decreased 107,000 tons, mainland cane processors' stocks decreased by 14,000 tons and importers of direct consumption sugar stocks decreased about 8,000 tons.

3. Charges to quotas January 1 to March 31, 1965 were 3,222,255 short tons, raw value, leaving a balance of 5,977,745 tons to be supplied within the 9,200,000 ton total.

4. Regionally, January-February deliveries, 1965 as compared to 1964, were up in 2 of the 5 regions: Increases -- North Central 54.0 percent, South 4.6 percent. Decreases -- New England down 16.3 percent, Middle Atlantic down 8.4 percent, West down 8.5 percent.

5. February 1965 distribution of corn sweeteners by corn refiners - the equivalent of 128,000 short tons raw value, up 7,000 tons from January 1965 and up 1,000 tons from February 1964. Corn sirup distribution February 1965 - 87,000 tons, up 3,000 tons from January 1965 and up 1,000 from February 1964. Distribution of dextrose February 1965 - 41,000 tons, up 4,000 tons from January 1965 and the same as for February 1964.

<sup>1/</sup> Spot prices during 1960 were for sugar in bags under Contract No. 6 plus .50 cent per pound duty (Cuban). Beginning with 1961, spot prices are for bulk sugar under Contract No. 7, the terms of which are duty paid or duty free.

<sup>2/</sup> Spot prices during 1960 based on No. 4 Contract which was for bagged sugar f.a.s. Cuba. Beginning with 1961 spot prices are those under No. 8 Contract which is also for bagged sugar but f.o.b. and stowed at Greater Caribbean ports (including Brazil).

<sup>3/</sup> For 1960 these amounts are the difference between the spot prices of the No. 6 "Domestic" Contract rolled back to Cuba (minus freight and insurance) and the spot prices of the No. 4 "World" Contract. Beginning with 1961 the No. 7 "Domestic Bulk" Contract has been adjusted by deducting duty (.625¢), computed freight from the Greater Caribbean ports (including Brazil), insurance and unloading charges and adding the bag allowance (currently .055¢) before calculating the differential from No. 8 "World" Contract spot prices.

<sup>4/</sup> These are basis prices in 100-pound paper bags, NOT delivered prices. To obtain delivered prices add "Freight Prepays" and deduct discounts and allowances. For illustration see Sugar Reports No. 81, January 1959, pages 5 to 9.

<sup>5/</sup> New series beginning January 1964 which may not be strictly comparable with data for earlier periods. For old series through June 1964 see Sugar Reports 148, September 1964.

Table 15. Wholesale prices of sugar, corn sirup and dextrose

Period	:	:	:	:	:	:	:	:	:

:	: North-	:	: Dry <u>4/</u>	:	: Dry <u>4/</u>	:	: Dry	:	: Dry
:	: east 1/	: Quoted	: basis	: Quoted	: basis	: Quoted	: basis	: Quoted	: basis

<sup>1/</sup> Gross basis price in 100 pound bags subject to a 2 percent cash discount.

<sup>2/</sup> Hydrate, in 100 pound bags.

<sup>3/</sup> In drums, price in carload lots, except beginning February 1962 for less than carload lots. Quoted as 42 percent unmixed, except beginning March 1956, quoted as 43 percent unmixed.

<sup>4/</sup> Assumes price is for 92 percent solids for dextrose and 80.3 percent solids for corn sirup. Thus, dry basis price is quoted price divided by 0.92 for dextrose and 0.803 for corn sirup.

<sup>5/</sup> Revised.
